

### ITIC Systems Support

We provide cleared professional resources that are technically superior and highly motivated. Our staff is here to make a difference and are committed to accomplishing our customer's objectives. We always over-deliver.

*"Over the past five years ITIC has provided the highest quality work, and demonstrated unilateral professionalism for Unisys programs."*

Pam McGregor, Partner, DoD/Advanced Programs,  
Unisys Corporation

*"I have worked with ITIC for over 5 years, and consider them to be a highly valued part of our team."*

Donna Rhoads, Program Manager,  
Lockheed Martin IS&G

# DYNAMIC PEOPLE, POWERFUL RESULTS!

Systems Engineering  
and IT Support

At ITIC, we have over 100 years of collective experience in government IT Systems Engineering. As a Maryland based Veteran-Owned Small Business, we offer top notch support and expertise at a competitive cost. We are currently staffed at 15 ISSA/TS cleared employees with an additional 2.5 support staff.

Our candidates are carefully screened and matched to the job requirements. The deliberate care in our screening process guarantees a good fit for our customers and our candidates which ensures long-term success. Our future depends on it.

## IT SYSTEMS SUPPORT

- ENGINEERING
- ADMINISTRATION
- INTEGRATION
- OPERATIONS
- MANAGEMENT

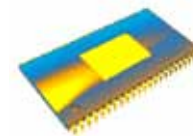

We're in the heart of an explosive IT era and managing change has never been more important. We understand the critical thinking and decision making that goes into managing IT infrastructure and we provide the responsive, competent people needed to make your mission a success.

## We understand the Technologies We understand YOUR business needs.

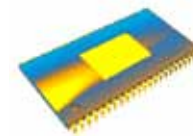

During the past five years ITIC has played an integral roll in the modernization and efficiencies of infrastructure for our primary government customers. Standing up major systems and evolving them into the highly reliable and mission critical systems our partners need is our directive. Deploying technologies such as network load balancing, application and database clustering, rapid provisioning and virtualization, physical server builds to establishing best practices to data center transitions are at the core of our experience.

Our skilled and experienced staff is providing support in almost all areas of the enterprise. We provide support in key areas like Engineering, O&M, Project Management, Integration, Planning and Operations.

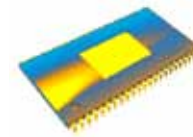

### TOP SHELF

ITIC only employs proven, dedicated and expertly trained professional staff.

### EDUCATION

We provide ongoing education and certification programs to ensure our team is on the leading edge of new technology and best practices.

### CUSTOMER SERVICE

Our performance is the driving force behind our success, and proactive interaction, support and communication are the foundation on which we stand.

YOUR MISSION IS OUR MISSION. HOW CAN WE HELP YOU?
